

Background of Establishment

- The rapid development of manufacturing industries in Indonesia, particularly the last one decade, especially in automotive, home appliances, office automation equipment industry that requires a lot of precision and high quality rubber components.
- Not many rubber components companies can provide good quality products and maintain the consistency of its quality.
- We saw this condition as an opportunity to develop business in the manufacture of rubber components.

Background of Establishment

- With the partnership between Sansho Kogyo Co., Ltd Japan and PT. Duta Nichirindo Pratama.

Sansho Kogyo Co., Ltd. is a manufacturer of rubber components which already have a long history and expertise in their field, this company already has 4 factories in Japan and 1 factory in China.

While PT. Duta Nichirindo Pratama is a manufacturer of leading automotive filters in Indonesia, with experienced in supplying OEM customers for a long time and market recognition in the domestic market of automotive components.
